

Optician Diploma

Acquire the knowledge and skills required for practice within the field of opticianry, including eyeglasses, contact lenses, low vision devices, automated refraction, and develop professional skills in business management, communication, and customer service. This program is currently registered for accreditation with Accreditation Canada/Equal. Accreditation is a rigorous external process designed to provide program quality assurance according to a predetermined set of national standards. Our current “registered” status is not a full accreditation status, nor does it guarantee eventual accreditation. Nevertheless, our pursuit of accreditation is in alignment with VCC’s ongoing commitment to providing each student with the quality programming and skills training they expect from our institution. Check the program page for details.
